

Online Backups

Managed Cloud Solutions

Sentronex Online Backup offers the simplest, most secure system of offsite backup for data held on PCs, laptops, and servers. We protect 100's of millions of files daily for individual users and SMEs.

Sourcing the world's best backup hardware and software technologies we offer exceptional levels of security, expertise and support.

Our online backup solutions ensure your data is automatically backed up each day to mirrored offsite data centres and is recoverable with a few clicks of a mouse.

Sentronex enables you to set and forget your daily backup process giving you maximum data protection with minimum effort. It couldn't be simpler or safer.

If you are currently backing up to an external harddrive, tape or CD call us to find out how Sentronex can improve the security of your data, streamline your backup process and save you money too.

Sentronex data backup solutions are an essential element of any business continuity strategy. Should disaster strike, Sentronex will get your business up and running again – fast!

Online Backup Solutions for PCs, Laptops, Servers & Networks

The disk-to-disk backup solution delivers the simplest, most secure system of offsite data backup for PCs, laptops, servers and network environments.

Following a simple software download your data is automatically backed up each day to mirrored offsite data centres and is recoverable with a few clicks of a mouse.

If you are currently backing up your data to either a tape system or external hard drive call us to find out how we can improve the security of your data and make the backup process more efficient.

Protecting your data couldn't be simpler, or safer.

5 Steps to Secure Data Backup

1. Simple software download in which files for backup and daily backup time are selected
2. Data automatically compressed and encrypted for transmission
3. Data transmitted to secure offsite data centre for storage via your existing internet connection
4. Sentronex then mirrors data automatically to second data centre
5. Lost data can be retrieved through the software directly to your machine with a few clicks of a mouse
